

# Syllabus

## 1. Programme information

1.1. Institution	THE BUCHAREST UNIVERSITY OF ECONOMIC STUDIES
1.2. Faculty	Business Administration in Foreign Languages
1.3. Departments	Department of Business Administration (UNESCO)
1.4. Field of study	Business Administration
1.5. Cycle of studies	Master Studies
1.6. Education type	Full-time
1.7. Study programme	Entrepreneurship and Business Administration in Energy
1.8. Language of study	English
1.9. Academic year	2017-2018

## 2. Information on the discipline

2.1. Name	<b>Energy Business Risks</b>								
2.2. Code	<b>17.0252IF2.1-0002</b>								
2.3. Year of study	<b>2</b>	2.4. Semester	<b>1</b>	2.5. Type of assessment	<b>Exam</b>	2.6. Status of the discipline	<b>O</b>	2.7. Number of ECTS credits	<b>6</b>
2.8. Leaders	C(C)	<b>conf.univ.dr. BUSU Cristian</b>					cristian.busu@man.ase.ro		

## 3. Estimated Total Time

3.1. Number of weeks	14.00
3.2. Number of hours per week	3.00 of which
	C(C) 2.00
	S(S) 1.00
3.3. Total hours from curriculum	42.00 of which
	C(C) 28.00
	S(S) 14.00
3.4. Total hours of study per semester (ECTS*25)	150.00
3.5. Total hours of individual study	108.00
<i>Distribution of time for individual study</i>	
Study by the textbook, lecture notes, bibliography and student's own notes	40.00
Additional documentation in the library, on specialized online platforms and in the field	32.00
Preparation of seminars, labs, assignments, portfolios and essays	32.00
Tutorials	1.00
Examinations	1.00
Other activities	2.00

## 4. Prerequisites

4.1. of curriculum	Energy efficiency Energy Market Renewable energy and climate change
4.2. of competences	

### 5. Conditions

for the C(C)	Lectures are conducted in rooms equipped with video and internet access.
for the S(S)	Seminars are conducted in rooms equipped with computers (use EXCEL, @risk).

### 6. Acquired specific competences

	C4	Complex development and customization of financial and risk management techniques and instruments in energy business
--	----	--

### 7. Objectives of the discipline

7.1. General objective	Acquiring of knowledge and practical skills required in the energy sector risk analysis.
7.2. Specific objectives	Learning methodologies for analysis, applying the various methods and techniques of risk analysis in business in the energy sector. Identifying of the relevant data and the documentation for the construction of applications - using case studies and current methods of analysis (qualitative and quantitative)

### 8. Contents

8.1. C(C)		Teaching/Work methods	Recommendations for students
1	Introductory: Objectives and skills gained as a result of learning, accurate work methods and tools, data sources, and the requirements and standards of formative assessment during the study and final evaluation.	Lectures and methods based on interaction with students	Sport course is distributed electronically to students at the beginning of each module of activity
2	Risk, hazard, uncertainty - introduction. Types of risks		
3	Specificities of the energy sector. Development scenarios, risks, market characteristics		
4	Risk management - concepts, stages		
5	Risk identification - quantitative and qualitative methods		
6	Risk assessment - quantitative methods		
7	Risk treatment		
8	Risks of business		
9	Market risks		
10	Financial risks - sensitivity analysis of efficiency indicators		
11	Investment projects in energy sector		
12	Examples of best practices in risk management for the energy sector		

### ***Bibliography***

- Directive 2012/27/EU on energy efficiency, amending Directives 2009/125/EC and 2010/30/EU and repealing Directives 2004/8/EC and 2006/32/EC [OJ L315 p.1]
- Impact Assessment, Accompanying the document, Directive of the European Parliament and of the Council on energy efficiency and amending and subsequently repealing Directives 2004/8/EC and 2006/32/EC
- Panorama of energy, Energy statistics to support EU policies and solutions,, Eurostat, 2009
- Communication from the Commission to the Council and the European Parliament on the comprehensive risk and safety assessments ("stress tests") of nuclear power plants in the European Union and related activities, {SWD(2012) 287 final}
- Work Programme of the Agency for the Cooperation of Energy Regulators, ACER, 2012

8.2. S(S)		Teaching/Work methods	Recommendations for students
1	Introductory Seminar - Risk, hazard, risk management		
2	Perceptions of risk, standards	Presentation and discussion group	
3	Methods and techniques of risk analysis - software elements (risk)		It recommends the use of software
4	Risk identification - quantitative and qualitative methods	Presentation and discussion group	It recommends the use of software
5	Risk assessment - quantitative methods		It recommends the use of software
6	Risk treatment	Presentation and discussion group	
7	Financial risks - sensitivity analysis of efficiency indicators		It recommends the use of software
8	Financial risks - Monte Carlo simulation for efficiency indicators		It recommends the use of software
9	Risks of business	Presentation and discussion group	
10	Market risks	Presentation and discussion group	
11	Project evaluation		Public presentation of projects

## **9. Corroboration of the contents of the discipline with the expectations of the representatives of the epistemic community, of the professional associations and representative employers in the field associated with the programme**

Discussing discipline content, involvement of practitioners in drafting materials, discussions with experts in the field of investment projects, running projects in the energy sector

## **10. Assessment**

Type of activity	Assessment criteria	Assessment methods	Percentage in the final grade
10.1. C(C)	Involvement in the lecture with questions, comments, examples of analysis.	Record the frequency and mode of participation involved in classes (including test your knowledge)	10.00

10.2. S(S)	Involvement in the preparation and discussion of issues	Record the frequency and mode of participation involved in seminar classes, namely the quality of results in solving case studies and individual project. Evaluate disciplinary project (prerequisite - ebalorarea and presentation of the project before the final written exam)	30.00
10.3. Final assessment	Examination	Written examination	60.00
10.4. Modality of grading	Whole notes 1-10		
10.5. Minimum standard of performance	Development of an individual project based on stages presentation of risk management		

Date of listing,  
07/22/2018

Signature of the discipline leaders,

Date of approval in the  
department

Signature of the Department Director,
